SWITCH BLADE™

STATIC, ZERO-DEGREE HYDRO EXCAVATION NOZZLE

**DIG FASTER.
SAVE WATER.**

PERFORMANCE – Complete jobs faster with more runtime and less downtime. A combination of (1), (2), or (4) 0° solid stream nozzles provide greater impingement, allowing you to cut through soil faster while using dramatically less water. The Switchblade's long, linear flow path is ideally suited for trenching applications.

DURABILITY – These heavy duty, high impact nozzles are constructed with stainless steel housings and tungsten carbide wear surfaces to withstand harsh environments and provide longer life than stainless steel nozzle tips.

SAFETY – Non-conductive urethane coating on the nozzle body protects the operator and sensitive underground utilities.

FLEXIBILITY – Individual, replaceable, color-coded nozzle pills allow you to change water flow rate and pattern based on current soil conditions.
