Patent Pending

# Why a **ARMOR GUARD**?

**Protects Operator from Spray:** Contains water spray, reducing ricochet and injuries.

**Shields from Debris:** Prevents flying debris from hitting the operator.

**Minimizes Chemical Exposure:** Reduces splashback of harmful chemicals.

**Prevents Surface Damage:** Directs water to avoid damaging nearby surfaces.

**Improves Visibility:** Keeps the operator's view clear during cleaning.

**Reduces Slip Hazards:** Contains water to prevent surrounding areas from becoming slippery.

**Decreases Operator Fatigue:** Reduces strain by minimizing blowback.

**Enhances Operator Safety:** Shields the operator from high-pressure water and debris.

**Controls High-Pressure Recoil:** Lessens recoil force, improving handling.

**Prevents Accidental Contact:** Keeps the nozzle away from unintended targets.

**Keeps Work Area Clean:** Contains mess, minimizing worksite hazards.

**Protects Pedestrians:** Shields public from spray and debris in busy areas.

**Prevents Infrastructure Damage:** Avoids unintentional damage to nearby buildings and vehicles.

## Armor Guard Splash Protector – Product Specs

- Material: High-strength aluminum body, colored anodized finish (customizable).
- 8000lbs PSI rating
- Connection: 1/2 inch & 3/4 inch NPTF pass-through.
- Mounting: 6-20lbs heavy-duty magnets to hold firm in muddy and water conditions.
- Diaphragm: 8-inch flexible rubber for splash protection, easily uncoupled for safety.
- Retractable: Guard retracts when not in use.
- Quick-Release: Diaphragm can be quickly removed for operator safety.
- Applications: Industrial, commercial high-pressure washing and Hydrovac operations.

**BUILT BY OPERATORS FOR OPERATORS!**
